

Audience Segment Pages

PAGE 1: Startups & Founders

Hero Section

Suggested Heading Built for Founders Who Need to Move Fast and Get It Right the First Time.

Sub-heading From MVP to market-ready product — we help startups design, build, and launch digital products faster, leaner, and smarter.

Pointers

- After launching 500+ startups, we know what kills an MVP before it ships.
- Fixed-price engagements available — no surprise invoices, ever.
- You get a named project manager and tech lead from Day 1.
- From idea to a Live product in as little as 6 weeks.

Primary CTA: Get Your Free MVP Roadmap

Secondary CTA: See Startup Case Studies

Client Logo Strip Logos of startup and early-stage product clients (static, monochrome, 8–10 logos).

Note: Everything above this line should be above the fold.

Trust Bar (Animated Counter)

Suggested Heading Trusted by Founders Across the Globe

- **500+** — Products launched across FinTech, HealthTech, SaaS, and eCommerce.
- **100%** — Job success. Clutch Champion. Upwork Top Rated Plus.
- **6 weeks** — Average time from brief to live MVP for qualifying projects.
- **65%** — Our startup clients return to build their next product with us.

Fear Segment

Suggested Heading Why Most Startups Burn Their First Build Budget

3 blocks with icon + heading + text

Wrong Tech Decisions Early — Choosing the wrong stack, architecture, or platform in week one creates six months of rework later. 75% of IT and software projects overrun their budgets, and early tech choices or architecture flaws are the root cause.

Scope Creep & Missed Deadlines — Without a structured discovery process, features get added, timelines slip, and budgets double. 70% of first-time digital builds go over budget — usually because no one had a hard conversation about priorities upfront.

Building What Users Don't Want — Launching without validating core assumptions is the fastest way to waste a seed round. A product that looks great but solves the wrong problem will flatline on the first day.

Our Solution

Suggested Heading Why Founders Choose Matrix Media

Challenge	Our Solution	Business Impact
Unclear technical direction	Free MVP Roadmap with stack recommendation and build timeline	Confident decision-making before a single rupee is spent
Budget overruns	Fixed-price project model with milestone-based delivery	Full cost visibility from Day 1
Slow time to market	AI-accelerated development and agile sprint cycles	Launch faster without compromising quality
No internal tech team	Dedicated tech lead + PM embedded in your project	You stay focused on the business, we handle the build

Post-launch
uncertainty

12-month support SLA and growth
optimization included

Product stays live, fast, and
improving after launch

Service Line

Suggested Heading Everything a Founder Needs — From Zero to Scaled

Rapid MVP Development — Lean, focused, and built to validate your core hypothesis fast. We strip out everything that doesn't need to be in version one — and build what does, properly.

UI/UX & Product Design — User-tested interfaces that make your product intuitive from the first session. We design for retention, not just aesthetics.

Web & Mobile Development — Full-stack development across web, iOS, and Android — built on scalable, modern architecture that grows with your user base.

AI Feature Integration — Embed intelligent features into your product from day one — recommendation engines, automation workflows, AI-assisted onboarding, and predictive analytics.

Cloud & DevOps — Launch on a scalable, reliable infrastructure. We set up your cloud environment, CI/CD pipelines, and monitoring — so your product stays live and fast as your user base grows.

Digital Growth Marketing — Early-stage SEO, performance campaigns, and content strategy built to acquire your first 1,000 customers and prove your growth model to investors.

Industries We Serve

Suggested Heading Sectors We've Launched Products In

FinTech — HealthTech — SaaS & B2B Tools — eCommerce — EdTech — PropTech — LegalTech — On-Demand & Marketplace

Dedicated Teams Banner

Suggested Heading Your Dedicated Engineering Team, On Demand

Fully managed, embedded remote development teams operating as a seamless extension of your organization. Swift onboarding in under 2 weeks, aligned to your tools and processes.

Case Study Strategy

Suggested Heading Real Products. Real Founders. Real Outcomes.

(To show startup related Case Studies)

Case Study Format

- The founder's challenge / problem to solve
 - Tech and AI approach taken
 - MVP scope and what was cut vs kept
 - Time to launch
 - Post-launch traction (users, revenue, retention)
 - Industry
-

Process Methodology

Suggested Heading The Matrix Launch Framework

1. **Free MVP Roadmap Session** — We map your product, challenge your assumptions, and define the smartest path to launch.
2. **Discovery & Architecture** — Tech stack decision, system design, third-party integrations, and full project scoping.
3. **Design & Prototype** — UX wireframes, UI design, and clickable prototype — validated before development begins.
4. **Agile Build & QA** — Sprint-based development with weekly demos, continuous testing, and zero surprises.
5. **Launch & Stabilization** — Go-live, performance monitoring, bug resolution, and user feedback loops.

6. **Iterate & Scale** — Post-launch optimization, feature expansion, and growth engineering based on real data.
-

Testimonials

Suggested Heading What Our Founders Achieved

(Startup-specific testimonials with founder name, company, country, and a specific outcome metric)

FAQ

Do you work with pre-revenue startups? Yes. We work with founders at idea stage, pre-seed, seed, and Series A. Our Free MVP Roadmap session is specifically designed for early-stage founders.

Can you help me decide what to build first? Absolutely. Our discovery process is built around prioritizing the right features for your first launch — not building everything at once.

Do you offer fixed-price projects? Yes. For well-scoped projects, we offer fixed-price engagements with milestone-based payment schedules.

How long does an MVP take to build? Most MVPs are delivered within 6–12 weeks depending on scope. Our Free MVP Roadmap session will give you an accurate timeline before you commit.

Can you build both web and mobile? Yes. We build across web, iOS, and Android — and can advise on which platform to prioritize for your first release.

Do you sign NDAs? Yes. We sign NDAs before any discovery conversation. Your idea and IP are protected from the first call.

What happens after launch? We offer a 12-month post-launch support SLA covering monitoring, updates, performance optimization, and iterative development.

Can you integrate AI into my product? Yes. We embed AI features — automation, personalization, recommendations, and intelligent workflows — into products at any stage.

What if my scope changes mid-build? We manage scope changes transparently. Any additions are assessed, priced, and approved before work begins — no hidden costs.

PAGE 2: SMEs & Growing Businesses

Hero Section

Suggested Heading Stop Leaving Revenue on the Table. We'll Show You Exactly What's Broken — Free.

Sub-heading For established businesses ready to grow — we audit, fix, and scale your digital presence across web, marketing, and operations using AI-powered strategy and 22 years of proven delivery.

Pointers

- Free digital audit with specific, actionable findings — not a generic report.
- We identify the exact gaps costing you leads, traffic, and revenue.
- Dedicated account strategist from Day 1.
- Integrated delivery across web, marketing, AI, and design — no agency juggling.

Primary CTA: Get Your Free Digital Audit

Secondary CTA: See SME Case Studies

Client Logo Strip Logos of SME and mid-market clients (static, monochrome, 8–10 logos).

Note: Everything above this line should be above the fold.

Trust Bar (Animated Counter)

Suggested Heading Trusted by Growing Businesses Across Industries and Continents

- **750+** — SMEs and growing businesses scaled across web, marketing, and technology.
 - **100%** — Job success. Clutch Champion. Upwork Top Rated Plus.
 - **3x** — Average ROI improvement across active SME client engagements.
 - **65%** — Our SME clients return for their next growth project.
-

Fear Segment

Suggested Heading Why Growing Businesses Hit a Digital Ceiling

3 blocks with icon + heading + text

- Fragmented Digital Presence** — Website, marketing, social, and operations managed by different vendors results in inconsistent messaging and duplicated costs. SMEs lose an average of 15–20% of their annual budget on duplicated efforts.
- Traffic Without Conversion** — 98% of paid ad traffic bounces without taking a single action. Most SME websites were not built to convert — they were built to look good. Without CRO-focused architecture, traffic is just an expense.
- No Time to Manage It All** — SME owners and marketing teams are already stretched. Managing multiple agencies, chasing reports, and making decisions without clean data is a full-time job on top of a full-time job.

Our Solution

Suggested Heading Why SMEs Choose Matrix Media

Challenge	Our Solution	Business Impact
Underperforming website	Free audit + CRO-focused redesign or optimization	More leads from existing traffic without increasing ad spend
Inconsistent marketing results	Integrated SEO, paid media, and content strategy	Predictable, measurable pipeline growth
Too many vendors	Single partner across web, marketing, AI, and design	Reduced overhead, unified strategy, one invoice
No visibility on performance	GA4, GTM, and custom dashboard setup with monthly reporting	Clear ROI on every channel, every month

Manual operational
bottlenecks

AI automation workflows for
lead management and
operations

Reclaimed hours and reduced
operational cost

Service Line

Suggested Heading A Complete Digital Growth Engine — Built Around Your Business

CRO-Focused Web Development — Websites built to convert, not just look good. Every design and development decision is made with your lead generation and revenue goals in mind.

UI/UX Redesign — Fix the experience gaps that are silently killing your conversion rate. We audit your current product, redesign problem flows, and deliver interfaces that reduce drop-off and increase user action.

AI-First Digital Marketing — SEO, AEO, GEO, and paid media managed as one integrated system — built to grow qualified pipeline across Google, AI search engines, and paid channels.

AI & Business Automation — Automate your manual marketing, sales, and operational workflows so your team stops firefighting and starts focusing on growth.

Mobile App Development — Extend your business to mobile with a high-performance app built for your customers — designed to increase engagement, retention, and revenue per user.

Cloud & DevOps — Reduce infrastructure costs, eliminate downtime, and speed up your deployments. We audit your current setup and optimize your cloud environment for reliability, performance, and growth.

Case Study Strategy

Suggested Heading Real Business Outcomes Delivered

Case Study Format

- Business challenge and growth blocker
 - Audit findings and strategic approach
 - Channels and tools deployed
 - Measurable result (leads, traffic, revenue, CAC reduction)
 - Timeline
 - Industry
-

Process Methodology

Suggested Heading The Matrix Growth Framework

1. **Free Digital Audit** — We assess your current digital presence across web, SEO, paid, and conversion and deliver a prioritized findings report.
2. **Strategy & Roadmap** — We build a 90-day growth plan with clear goals, channel priorities, and expected outcomes.
3. **Foundation Fix** — Technical issues, tracking gaps, and quick wins are resolved before scaling begins.
4. **Growth Execution** — Campaigns, content, and optimization work runs in parallel with weekly progress updates.

5. **Measure & Report** — Monthly performance review with your dedicated strategist — results, insights, and next steps.
 6. **Scale & Expand** — Once the foundation is proven, we expand winning channels and introduce new growth levers.
-

Testimonials

Suggested Heading What Our Clients Achieved

(SME-specific testimonials with business owner name, company, industry, country, and a specific growth metric)

FAQ

What does the free digital audit cover? We audit your website performance, SEO health, paid campaign efficiency, conversion funnel, and analytics setup — and deliver a prioritized action plan within 5 business days.

Do you work with businesses that already have a marketing team? Yes. We work alongside in-house teams as a specialist partner, filling gaps and adding strategic capacity where needed.

Can you manage just one service, like SEO or paid ads? Yes. We offer individual service engagements as well as fully integrated growth partnerships.

How quickly can we start? Most SME engagements kick off within 2 weeks of the initial strategy session.

Do you offer month-to-month contracts? We recommend a minimum 3-month engagement to see meaningful results, particularly for SEO and content. Paid media can show results faster.

How do you measure success? We agree KPIs upfront — leads generated, cost per acquisition, organic traffic growth, and conversion rate — and report against them monthly.

Can you fix an underperforming website without a full redesign? Yes. Our audit will determine whether optimization or a full redesign is the right call. We won't recommend a redesign if targeted fixes will deliver the same result.

Do you provide transparent pricing? Yes. All engagements are quoted clearly upfront with no hidden fees. We offer both project-based and monthly retainer models.

PAGE 3: Enterprise

Hero Section

Suggested Heading Enterprise-Grade Digital Delivery. Startup-Speed Agility. 22 Years of Proof.

Sub-heading For enterprises and scaling organizations that need a reliable, secure, and strategically aligned technology and marketing partner — with the institutional depth to deliver at scale and the agility to move when it matters.

Pointers

- ISO 9001:2015 certified delivery with documented quality frameworks.
- Dedicated solution architect and engagement manager from Day 1.
- Enterprise security standards — NDA-first, data protection, MFA and encryption by default.
- Flexible engagement models: dedicated teams, project-based, or hybrid retainer.

Primary CTA: Talk to a Solution Architect

Suggested Heading Trusted by Enterprises Across Industries and Continents

- **23+** — Years delivering enterprise-grade technology and digital transformation projects.
 - **100%** — Job success. Clutch Champion. Upwork Top Rated Plus.
 - **150+** — Specialists across technology, marketing, AI, design, and cyber security.
 - **20+** — Countries served including the US, UK, UAE, Singapore, and Australia.
-

Fear Segment

Suggested Heading Why Enterprise Digital Initiatives Stall

3 blocks with icon + heading + text

Vendor Fragmentation — Multiple agencies, freelancers, and offshore teams with no unified ownership. Gaps between design, development, marketing, and data create delays, miscommunication, and accountability black holes.

Delivery Risk at Scale — Over 50% of large-scale enterprise projects fail due to lack of process. Without ISO-certified quality frameworks, dedicated project governance, and transparent milestone tracking, enterprise projects overrun — in time, budget, and scope.

Security & Compliance Exposure — Enterprise data, IP, and customer records require more than a standard NDA. Without data protection compliance, robust access controls, and documented security protocols, every vendor engagement is a liability.

Our Solution

Suggested Heading Why Enterprises Choose Matrix Media

Challenge	Our Solution	Business Impact
Fragmented delivery across vendors	Single accountable partner across tech, marketing, AI, and design	Unified strategy, cleaner communication, faster execution
Unpredictable project delivery	ISO 9001-certified processes with milestone governance and weekly reporting	On-time delivery with full visibility at every stage
Security and compliance risk	NDA-first, data protection-compliant, MFA and encryption protocols as standard	Reduced liability and protected enterprise data
Difficulty scaling tech teams	Dedicated Teams model with rapid onboarding and embedded delivery	Scale capacity up or down without HR overhead

Legacy system
limitations

Modernization and migration
expertise across platforms and
architectures

Future-ready infrastructure
without operational
disruption

Service Line

Suggested Heading Full-Spectrum Enterprise Digital Capability — Under One Roof

Dedicated Engineering Teams — Fully embedded, managed development teams that operate as an extension of your organization — with the speed of an agency and the accountability of an in-house hire.

Enterprise Web & Platform Development — Scalable, secure web platforms and enterprise applications built on modern architecture — from complex portals and intranets to customer-facing platforms handling millions of sessions.

AI & Intelligent Automation — Enterprise AI implementation across process automation, predictive analytics, AI-assisted decision-making, and custom large language model integrations that reduce operational cost and improve output quality.

Digital Marketing at Scale — Integrated SEO, paid media, content, and lifecycle marketing programs managed with enterprise-grade reporting, attribution modelling, and dedicated strategy oversight.

Cyber Security & Compliance — End-to-end security services covering penetration testing, vulnerability assessments, compliance audits, and ongoing monitoring — protecting your infrastructure, applications, and data.

Digital Transformation Consulting — Strategic advisory for organization's navigating legacy modernization, platform migration, or digital-first transformation — grounded in 22 years of cross-industry delivery experience.

Financial Services & FinTech — Healthcare & Life Sciences — Retail & eCommerce —
Manufacturing & Industrial — SaaS & Enterprise Technology — Real Estate & PropTech —
Logistics & Supply Chain — Government & Public Sector

Case Study Strategy

Suggested Heading Enterprise Outcomes. Documented and Measurable.

Case Study Format

- Business challenge and scale of the engagement
 - Technical and strategic approach
 - Governance and delivery model used
 - Measurable outcomes (cost reduction, efficiency gain, revenue impact, time saved)
 - Timeline and team size
 - Industry and geography
-

Process Methodology

Suggested Heading The Matrix Enterprise Engagement Framework

1. **Solution Architecture Session** — Senior solution architect maps your requirements, constraints, and success criteria before any proposal is issued.
2. **Proposal & Governance Design** — Detailed project plan, team structure, milestone framework, security protocols, and commercial model — all documented and agreed upfront.
3. **Team Onboarding & Setup** — Dedicated team assembled, tools configured, access provisioned, and communication cadence established within 2 weeks.
4. **Phased Delivery with Milestone Governance** — Sprint-based delivery with weekly status reporting, fortnightly milestone reviews, and escalation protocols in place.
5. **Quality Assurance & Security Review** — ISO 9001 QA processes, security audits, and compliance checks at every major milestone.
6. **Handover, Training & Long-Term Partnership** — Full knowledge transfer, team training, and an ongoing support and optimization retainer for continued partnership.

Testimonials

Suggested Heading What Our Enterprise Clients Achieved

(Enterprise-specific testimonials with client name, title, organization, country, and a specific business outcome metric)

FAQ

What engagement models do you offer for enterprise clients? We offer dedicated team models, project-based engagements, hybrid retainers, and long-term managed service partnerships — structured around your internal processes and governance requirements.

How quickly can you onboard a dedicated team? Most dedicated team engagements are fully onboarded within 2 weeks of contract signature.

Are you data protection compliant? Yes. All engagements involving data are handled under data protection-compliant processes, documented data handling agreements, and appropriate access controls.

Do you sign enterprise NDAs and MSAs? Yes. We are open to signing standard NDAs before any discovery conversation and work within client-standard MSA frameworks.

What is your quality assurance process? We operate under ISO 9001:2015 certification with documented QA frameworks, milestone-based review cycles, and dedicated QA resources on every enterprise engagement.

Can you work alongside our existing internal teams? Yes. We frequently operate as an embedded extension of in-house technology or marketing teams, aligning to your tools, processes, and reporting structures.

How do you handle intellectual property? All IP developed during an engagement is fully assigned to the client upon project completion and payment, with no retention of proprietary code or assets.

Which time zones do you support? We offer overlap hours coverage for US, UK, UAE, and APAC time zones, with dedicated project managers aligned to client working hours.

Can you handle multi-country or multi-platform enterprise projects? Yes. We have delivered large-scale digital programs across multiple geographies, platforms, and regulatory environments.
